छुट्टी के लिये विमुक्ति का दायित्व
AUTHORIZATION FOR DAMA/LAMA – DISCHARGE AGAINST MEDICAL ADVICE

यह प्रमाणित किया जाता है कि मैं BABY VAISHNAVI चाचा नेहरू बाल चिकित्सालय सरकारी अस्पताल, दिल्ली का रोगी, मेरा इलाज करने वाले डॉक्टर व चिकित्सालय प्रशासन कि राय के विरुध्द अस्पताल से छुट्टी ले रहा हूँ। मैं स्वीकार करता हूँ कि मुझे इस से संबंधित खतरों से अवगत करा दिया गया है तथा मैं इसके द्वारा चिकित्सालय छुट्टी के कारण होने वाली किसी खराबी के लिये समस्त ज़िम्मेदारियों से अपना इलाज करने वाले चिकित्सक व अस्पताल को मुक्त करता हूँ।

This is to certify that I BABY VAISHNAVI a patient in Chacha Nehru Bal Chikitsalaya Govt. Hospital, Delhi am being discharged against the advice of the attending physician and of the hospital administration. I acknowledge that I have been informed of the risk involved and hereby release the attending physician and the hospital from all responsibility for any ill effects which may result from discharge from the hospital.

Laboratory Report

Investigations	Observed Values	Unit	Biological Reference Range	Interpretation
1. Biopsy (Specimen: BIOPSY)	CN-319/23			
Interpretation:-		REPORT		
Labelled as left cervical Lymph Node:- Received a lymph node measuring 1.8x1.5x1.5 cm.				
Section examined shows effacement of lymph node architecture by atypical cells. These cells are arranged in sheets and nests, are large, round to oval with moderate nuclear pleomorphism show nuclear irregularity, opened up chromatin, inconspicuous nucleoli & scant to moderate eosinophilic cytoplasm. There is brisk mitosis with numerous apoptotic bodies & focal areas of necrosis with few pleomorphic forms. Background shows few reactive lymphoid cells.				
On IHC, these cells show strong & diffuse nuclear expression for myogenin & are negative for CD 117, TdT & synaptophysin.				
Impression:- Infiltration by malignant small round tumour, IHC favouring the diagnosis of Rhabdomyosarcoma.				
Advise:- Clinico-radiological correlation. - Molecular studies.

SURGICAL PATHOLOGY REPORT @

SPECIMEN : Left cervical lymph nodes.

CLINICAL HISTORY : Left orbital tumor + left cervical lymph node present ? RMS ?
Lymphoma.

GROSS : Received party cut open 1 lymph node measuring 2.3 x 1.8 x 1.6
cm. Cut surface is grey yellow, soft.

MICROSCOPY & IMPRESSION : Left cervical lymph nodes:

- Effaced nodal architecture by a diffuse infiltrate of large sized atypical round cells.
- They have round to indented eccentric nuclei, coarse dark chromatin with inconspicuous nucleoli and small amount of eosinophilic cytoplasm.
- Numerous apoptosis and frequent mitosis are present.
- **Malignant round cell tumor.** ✓

ADVISED : IHC Z707 to categorized it From Lal Lab.
Blocks - from CHB to referred centre.

HISTOPATH NO : [LPL/B/197477/23 : Representative sections]

Classification: Internal

Note: 1. Slides / Blocks can be issued only on advise of the referring consultant after a minimum of 48 hours.
 2. Gross specimens will be retained only for a period of 1 month after the date of reporting.
 3. Contact histopathology department for any clarification.

Committed to excellence

Test Registered On	21/04/2023 09:12:12	Barcode	
Patient Name	Baby VAISHNAVI	Mobile No	9650157305
Age / Gender	1 Yrs 6F Male	Test Reported On	22/04/2023 16:20:18
Test Requested ID	10232407	Test Printing On	22/04/2023 16:20:21
Referred By	CHACHA NEHRU BAL CHIKITSALYA		

IMPRESSION: - CECT head & orbit reveals diffusely bulky and heterogeneously enhancing soft tissue density mass lesion nearly completely replaced left infratemporal fossa with intraorbital and intracranial extension, erosive destruction of intervening osseous structures of anterior and middle cranial fossa and associated findings as described, indicating neoplastic disease, may be consistent with rhabdomyosarcoma. D/d: lymphoma / other malignant round cells tumours.

Advice: - Clinical and histopath correlation.

Laboratory Report

Investigations	Observed Values	Unit	Biological Reference Range	Interpretation
1. Fine Needle Aspiration Cytology (FNAC) (Specimen:FNAC)	CYT-247/23			

Interpretation:-

REPORT

FNAC done from left cervical swelling yielded blood mixed aspirate.

Cytology smears are moderately cellular showing atypical cells dispersed singly and in loosely cohesive clusters, occasional rosettoïd arrangement also seen. The individual atypical cells are large with high N:C ratio with uniformly distributed chromatin, nuclear moulding, inconspicuous nucleoli and scant amount of cytoplasm. Few binucleated and multinucleated cells also seen with occasional mitosis in these atypical cells. Background is hemorrhagic and show many reactive lymphoid cells, plasma cells and occasional eosinophils.

Findings are suggestive of lymph node involvement by Small Round Cell Tumor.

Advise:-Clinico radiological correlation.

Note:- In view of proptosis (left side), patient may be worked- up for retinoblastoma.
